Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1- are rejected under 35 U.S.C. 102(e) as being anticipated by Anderson et al. (US 7,181,821)

The applied reference has a common assignee with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Regarding claim 1, Anderson et al. disclose a method of marking a location of a tubular joint comprising tubular ends (601, 602) joined together (col. 22, lines 11-41), the method comprising the steps of:

creating a cavity (603) into an end surface of one of the tubular ends that are to be joined together (figures 27-28, col. 22, lines 44-45);

inserting a marker (604) into said cavity (figures 27-28, lines 46-48); and

subsequently joining the tubular ends (figures 27-28, col. 22, lines 48-53).

Regarding claims 2-4, Anderson et al. disclose the tubular ends are joined by welding, by forge welding, or by a screw thread connector (col. 22, lines 15-18).

Regarding claims 5, 27-29, Anderson et al. disclose the tubular having substantially disk shaped end surfaces that are pressed against each other when the tubular ends are joined (col. 22, lines 54-59).

Regarding claim 6, Anderson et al. disclose the marker comprises an electronic tag, magnetic or radioactive material (col. 22, lines 46-47).

Regarding claim 7, Anderson et al. disclose the cavity being machined at or near the center of said end surface (col. 22, lines 44-45).

Regarding claims 8-12, refer to claims 1-7 and 27-29 above.

Response to Arguments

3. Applicant's arguments with respect to claims 1-12 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion
